Local & General

Born--To Mr. and Mrs. Sam Klein on Saturday, September 3, a daughter.

Mr. Earl Boss of Mossleigh is a visitor in town.

Mr. Deubler, Mrs. McIntyre and Mrs. Clever were Calgary visitors Tuesday.

Olson Matheson of Long Beach California is a business visitor in town.

Mr. and Mrs. J. Fields of Calgary were week end guests of Mr. and Mrs. F. Clapp.

Mr. Andrew Hill of Eugene, Oregon is here on his annual visit.

Miss Edna Stoddart of Calgary is the house guest of Miss Rheta Campbell.

Dr. and Mrs. Heal spent the week end and Labor Day at Waterton Lakes.

Miss Aileen McCullough expects to attend normal school in Calgary.

Mr. Horace Johnson is a visitor here, looking after interests, and renewing old acquaintances.

Mr. and Mrs. Basset of Clarksburg were guests at the home of Mr. and Mrs. Sharpe on Sunday.

Mr. B. M. Roberts, who has been visiting in Champion and district for the past week returned to Calgary Monday.

Born--To Mr. and Mrs. O. E. Sommers, at the Vulcan hospital, on Sunday, September 4, a son.

Mr. and Mrs. McKay and Mrs. Keighly of Brant were guests of Mr. and Mrs. G. M. Campbell on Sunday.

Dr. and Mrs. Freeze, who have been in Calgary for the past month expect to return to Champion next week.

Thanksgiving day will be observed on Monday, October 10. This is one month before Remembrance Day, November 11.

Mr. and Mrs. Roy Roberts of Calgary spent the holiday visiting at the home of Mr. and Mrs. A. Hopkins.

Mrs. Jake Klein received severe injuries when the team she was driving ran away. She was attended by Dr. Carson of Vulcan.

Mr. and Mrs. Bozarth, Mrs. Anderson, Miss Rheta Campbell and Mr. Andrew Anderson were Calgary visitors Sunday.

Miss Alice Ulfsten received word recently that her application had been accepted by the Holy Cross hospital and she expects to leave next week to enter training.

We regret to report that Verne Anderson, baseball star of Staveland, well known by many in this district, is in quarantine following an attack of infantile paralysis.

Due to an error in last week's paper we failed to add Blusson to the schools adjacent to Champion. Miss Kay is the teacher in charge.

Dr. H. C. Dimock, formerly of Nelson B. C., has opened a practice at Carmangay. Dr. Dimock has also established a fully equipped hospital at that point.

Dr. A. R. Hagerman, of the staff of the University of Toronto, who has been on a lecture tour which is sponsored by the medical association, spent a few days last week visiting at the homes of his brother, J. D. Hagerman, and his sister, Mrs. R. A. Clements.

Mr. and Mrs. A. Roberts of Barons visited Champion Friday, Mrs. Roberts and Beverly having just returned from a six weeks visit to Seattle and Vancouver. While in the latter city Mrs. Roberts was the guest of Mr. and Mrs. Hoskins, finding them in excellent health and enjoying life at the coast immensely.

Mr. and Mrs. R. Starr of Browning, Montana, accompanied by Mr. Frank Starr were Champion visitors Sunday. Mr. F. Starr remained in Champion.

Miss Mary Bowman, Miss Alva Bowman and Mr. J. Bowman motored to Calgary Tuesday, from which point Miss Alva Bowman will leave for Edinburg, Indiana, to resume teaching.

Mrs. Farmer and Miss Helen Farmer were Calgary visitors Tuesday. The latter remained in the city to attend normal school which opened Wednesday, September 7.

Mr. and Mrs. Olson and Mr. Ell Hopkins and daughter of Seattle are visiting at the home of Mr. and Mrs. Oscar Hagg and Mr. and Mrs. Tom Sletto.

Mr. and Mrs. Anderson and family of Strathmore have taken up residence in the home owned by Mr. G. Stoddart. Mr. Anderson recently purchased the pool hall from Mr. E. Latiff.

Mrs. Cowell and Miss Katherine Cowell have rented the home formerly occupied by H. Johnson.

Mrs. C. McLean will be hostess at her home to the Champion Women's Institute, for their regular monthly meeting on Tuesday afternoon, Sept. 13th.

An address by Mrs. J. N. Beaudier on Legislation, and community singing will be features of the program.

Harvesting commenced on Monday and continued throughout the week, excellent weather prevailing. Approximately 30% of the threshing had been completed when operations ceased due to rain. The average yield per acre is estimated at 22 bushels, with the occasional farmer reporting 30 to 35 bushels per acre.

Mr. Harper will visit Champion as usual and will teach at the residence of Mrs. B. N. Woodhull, Saturday morning September 10th.

Mr. and Mrs. D. D. Farmer at the residence of Mrs. D. D. Farmer

Mr. Harper will visit Champion as usual and will teach at the residence of Mrs. B. N. Woodhull, Saturday morning September 10th.

Mr. and Mrs. D. D. Farmer at the residence of Mrs. D. D. Farmer

Mr. Harper will visit Champion as usual and will teach at the residence of Mrs. B. N. Woodhull, Saturday morning September 10th.

Mr. and Mrs. D. D. Farmer at the residence of Mrs. D. D. Farmer

NOTES AND COMMENT.

Back to the Land

One of the phenomena growing out of the unsettled conditions of the last three years is the return flow of population to the farms which has become particularly apparent recently. Much of this has been the return of farm folk who had been in the city only a short time, and were forced by loss of their jobs to seek refuge back home. In other cases, unemployed families have moved to abandoned farmsteads where existence has been a bit less precarious than in the city.

More recently there have been attempts to promote an exodus from city to farm on a larger and more definitely organized scale. Part of this urge comes from city relief agencies which see an opportunity to rid themselves of some of their problems by transferring them to the country. Part of it comes from professional back-to-the-landers and part from commercial colonization organizations.

The wisdom of moving paupers to the country is doubtful. Country communities lack the resources and the organization to care for such people in any considerable numbers. To transfer the load to them is not fair, nor is it likely to result in adequate care for the unfortunate families so moved.

Few occupations are more difficult for an adult to learn than farming. There are few cases where such an attempt has resulted in success. Even where the purpose is merely to exist in the country on a subsistence basis, some capital is required, and there must be a certain cash income to pay for essential goods and services that the farm cannot supply.

Colonization companies are expert in painting a glowing picture of success on a five-acre farm, but unfortunately these dreams seldom come true. Many heartaches have resulted from colonization efforts in the past, and the future is not likely to tell a different story. For the protection of the public, organized colonization efforts should be under state or federal supervision. As a matter of fact, the number of commercial farmers is entirely adequate, and efforts to increase the number are not likely to be satisfactory.

The one phase of the back-to-the-land movement that offers hope of success is the opportunity for part-time farmers in localities that offer more or less regular industrial employment. In the vicinity of industrial cities, workers may be happier and more secure on small farms within driving distance of the factories. A small tract of land can be made to reduce living expenses materially, and occasional lay-offs, even for a protracted period, are much less serious. As industry becomes less centralized, opportunities for factory workers to live on small farms will be multiplied.

One difficulty with such a plan is the provision of adequate school facilities, a problem that becomes serious where the number of children is large in proportion to taxable property. The best solution of this problem is to follow the lead of some of the more progressive states in which the greater proportion of school expense is borne by the state. Education is primarily a state responsibility, and educational opportunity can never be equalized except by having the state shoulder the greater part of the expense.

This and other problems connected with the back-to-the-land movement should receive careful study. The result will be satisfactory only if careful and realistic planning support the first rush of enthusiasm.

Youthful Strength

Dr. Magnus Hirschfeld, the world-known authority on Sexology and Director of the Institute for Sexual Science of Berlin, Germany, created

TITUS-PEARLS

to help the millions of men and women who have lost or are losing their vital physical power. In his 35 years of practice and research, however, he realized that the weakening of man's glands was also responsible for other troubles: High blood pressure, hardening of the arteries, physical exhaustion after work or exercise, dizziness, depression, neurasthenia, etc.

All these troubles can be removed with Titus-Pearls. Numerous cases were treated by Dr. Hirschfeld in his Berlin Institute.

L. S. (State Official; 60 years old, married) complained of physical exhaustion, dizziness and tremors. Was easily tired. Mental powers dull and slow moving. Physical powers had been incomplete for previous 5 years. Blood pressure too high. Given 2 Titus-Pearls 3 times a day. 2 weeks later the medical report on this man was:—General health better, more vigor; dizziness much less and returning of power. Treatment continued and 2 weeks later L. S. reported again, this time to say that all weariness and exhaustion had gone; he felt fresh and buoyant. His blood pressure had fallen, and at 60 years of age he had regained the physical power and virility that he had known in the prime of his life.

Start regaining your youthfulness now! To-day! In 2 weeks time you will be aware of the new, virile force within you. Send \$5.00 (cash registered or money-order) for 2 weeks treatment. Write for booklet. C. O. D. orders accepted.

First Results Obtained In Scientific Attack On Weeds In The Prairie Provinces

Weeds stand pre-eminent among the causes of agricultural losses in Canada and oddly enough they have been the last of the pests of agriculture to occupy the serious attention of scientific investigators, states a report entitled, "Weed Survey of the Prairie Provinces," issued as the first publication of the National Research Council's Associate Committee on Weed Control.

In a popular account, entitled, "Weeds and Their Control," prepared under the auspices of the Committee for general distribution and issued simultaneously, it is declared that the worst weeds are widely adaptable as to soil and climate and ever recently settled areas such as the Peace River district are being gradually invaded and will eventually be overrun unless more effective defensive measures are adopted.

An estimate of the losses sustained is made:

"The committee's experiments have shown the wheat yield of weedy plots to be reduced by 18 to 44 per cent. It is 18 per cent of theervative estimate of the crop loss due to weeds in the prairie provinces which may be run, at current prices for wheat, oats and barley, to well over forty million dollars for an average crop. To this must be added the high cost of the mechanical cultivation done to keep weeds within bounds, the cost of threshing, handling and storing. Port Arthur and West Wilkes annually the equivalent of 96 train loads and 40 cars each of wheat, to correct cost of dockage, and many other kinds of losses due to weeds."

Dr. Robert Newton, director of the Division of Biology and Agriculture, National Research Laboratories, and the chairman of the committee, states in a foreword that cultural methods of control must be mainly depended upon, since the application of chemical herbicides is practicable only for small areas. Dr. Newton says:

"For most of the weeds fairly accurate cultural methods have been developed, and we may expect great improvement along this line when we have available the results of the studies of the growth habits of the weeds now being carried out by members of the committee. Previous progress has been achieved largely by the method of trial and error. It can be based on accurate knowledge of the effect of different treatments on the development of various weeds. It would appear that general control may in future be achieved in proportion as educational campaigns are successful in inducing farmers, at large to co-operate in the application of the best methods. Community effort is essential, as with many weeds, reinfestation from farm to farm takes place readily."

"Weed inspection systems might be improved by centralizing within each province the responsibility for both the appointment and supervision of inspectors, and by extending the legislation to require the cleaning of the seed. Municipal appointees are often poorly qualified and ineffective. The educational aspect of the work should be emphasized."

"This report goes out as the first publication of the Associate Committee on Weed Control. A second, dealing in a popular way with weed control, in the light of the new information already available to the committee, is being published simultaneously. Other papers, based on the large volume of investigation work under way, will follow in due course. It is confidently expected that these will be recognized as important contributions to the solution of a problem of the first importance to agriculture."

G. P. McLea, Professor of Agronomy, University of Manitoba; L. E. Kirk, Dominion Agronomist, Dominion Experimental Farms, Ottawa; George Gode, W. O. Smith and J. M. Manson, weed investigators of the Saskatchewan Department of Agriculture, the Alberta Department of Agriculture, and the Associate Committee on Weed Control respectively, are the joint authors of the report entitled, "Weeds and Their Control." The origin of the Committee is described in these terms:

"No such body of knowledge exists about weeds as about animal and

plant diseases and insects, and until very recently no adequate investigations were under way to obtain such knowledge."

"In recent years the exploitation by commercial firms of various chemicals as herbicides has provided a new interest in this old, but never widely used, method of weed control. The National Research Council, in response to requests from numerous organizations, called a conference in Edmonton in the fall of 1920, on the destruction of weeds by means of chemicals. At this conference it became clear that the whole field of weed control was urgently in need of investigation. The Council then appointed an Associate Committee on Weed Control, with representatives of the chief institutions concerned in the general problem, and the committee undertook the task of developing a co-ordinating program covering all aspects of weed control investigations."

"Having regard to the practicality of organizing the work, it was agreed that the initial activities should have more particular reference to the prairie provinces. Mr. J. M. Manson, of the University of Alberta, was engaged by the committee to make a reconnaissance survey of this province, and the results of his work might have a better picture of the situation with which it was confronted. The results of the survey are set forth in this report."

VARIOUS POINTS ABOUT THIS SMART DRESS HAVE BEEN THOUGHT OUT FOR MATRONS

For instance, the one-sided softly falling rever cuts the bodice breadth. Still more helpful perhaps is the broken line, created by the partial belt arrangement, which gives height to the figure. The inset panel at the centre-front, also does its bit toward slenderness.

Printed crepe silk is a lovely medium. The vester is lace. Style No. 438 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 4 1/2 yards of 38-inch fabric with 1/2 yard of 10-inch lace. Cuttings may also be in sheer batiste or lady novelty weaves. Sherr woollens are also suitable.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

PRACTISING FOR RECORD

Edmonton Youth Captures Covered Prize For Two Years In Success

Lawrence Dreier of Edmonton captured both the grand championship and the senior championship trophies in the annual competition of the Model Aircraft League of Canada which ended in Winnipeg recently.

It was the second year the youthful model builder came out on top of the list of competitors. The junior championship went to Joe Purvis, of Toronto.

Victor R. Hill of Vancouver, placed third in the senior scale model competition.

A Floating Museum

Admiral Byrd's Whaler Houses Kilauea Gashed At South Pole

Admiral Byrd's whaler, "The City of New York" on his trip to the South Pole is berthed at Chicago in the isagoon across from the Hall of Science in the Century of Progress Exposition after a trip through the Great Lakes. The deck has been kept intact with the admiral's quarters untouched, but the rest of the boat has been made into a museum. Members of the expedition still on the ship act as guides showing visitors to the fair, the Adelle penguin, Emperor penguins and other exhibits gathered at the Pole.

Quit Professional Careers

Noted Swimmers Reported As Intending To Give Up Quot For

The Toronto Daily Star says that Margaret Ravor, Philadelphia mermaid who won the \$3,000 first prize in the Canadian National Exhibition women's marathon swim, and George Young, noted Canadian marathon swimmer, will quit professional swimming after their marriage.

The Star quoted an unnamed "authority" in Johnny Walker's training camp as saying Young and his bride-to-be would settle down at a country place near Bracebridge, Ont.

Ericson Memorial

Unveiled In Iceland

American Minister To Denmark Officiated At Ceremony

Frederick W. B. Coleman, American Minister to Denmark, unveiled at Reykjavik, Iceland, a statue of Leif Ericson, the Icelandic hero, on his way to Greenland from Norway in the year 1,000, discovered America. The statue was presented to Iceland by the American people in 1930. Ericson is reputed to have touched Labrador, and possibly Newfoundland and Nova Scotia, in his voyage through the Arctic seas.

The deck has been kept intact with the admiral's quarters untouched, but the rest of the boat has been made into a museum. Members of the expedition still on the ship act as guides showing visitors to the fair, the Adelle penguin, Emperor penguins and other exhibits gathered at the Pole.

A Cousins, well-known English walker, who is pictured above in training for his forthcoming attempt to walk 200 miles in 48 hours.

Quit Professional Careers

Noted Swimmers Reported As Intending To Give Up Quot For

The Toronto Daily Star says that Margaret Ravor, Philadelphia mermaid who won the \$3,000 first prize in the Canadian National Exhibition women's marathon swim, and George Young, noted Canadian marathon swimmer, will quit professional swimming after their marriage.

The Star quoted an unnamed "authority" in Johnny Walker's training camp as saying Young and his bride-to-be would settle down at a country place near Bracebridge, Ont.

Ericson Memorial

Unveiled In Iceland

American Minister To Denmark Officiated At Ceremony

Frederick W. B. Coleman, American Minister to Denmark, unveiled at Reykjavik, Iceland, a statue of Leif Ericson, the Icelandic hero, on his way to Greenland from Norway in the year 1,000, discovered America. The statue was presented to Iceland by the American people in 1930. Ericson is reputed to have touched Labrador, and possibly Newfoundland and Nova Scotia, in his voyage through the Arctic seas.

STAND OF DOUGLAS FIRS

Stand of Douglas Fir on Vancouver Island, British Columbia. There are 175 billion feet of this timber growing on Vancouver Island.

When somebody said that trees were a thousand times more useful than they did not exaggerate. It is for this reason that Mr. Frank D. Barjum is carrying on a Dominion-wide crusade for the conservation of our timber.

The above shows a handful of Douglas fir near Victoria. There are estimated to be over 120 billion feet of this timber growing on Vancouver Island. Mr. Barjum is carrying on a Dominion-wide crusade for the conservation of our timber.

Mr. Barjum says: "Trees protect and beautify our farms and gardens, protect our drinking water supplies, our water power, fish, game and birds, provide lumber and fuel, pulp and paper, labor and transportation, taxes and dividends; are our greatest

promoter of health, beautify our city streets, protect our highways and check the ever growing menace of dust storms and hail, provide shelter from the scorching days of sun in summer and the icy blasts of winter, prevent cyclones, damaging floods, erosion and loss of fertility of the soil, provide recreation and a tourist industry which, without cost to the country, ranks second in its importance, hence including lumber and pulp, our four greatest industries are absolutely dependent upon our forests, and in fact nothing that we use or eat or wear can be produced, manufactured or transported without the aid of wood."

"No other element of the universe has so many uses (4,500 in number) or is of such vital importance as trees."

Three stained glass windows, designed for the rebuilt Bellevue Chapel in France, which portray the historic ties that bind the allies and France, recently were exhibited in Boston.

The figures of an allied soldier and a French pilot, Lafayette and Washington, Pere Marquette and Champlain, occupy the places usually reserved for Biblical subjects.

St. George Williams was the founder of the Young Men's Christian Association.

Vancouver Now Claims To Be The Largest Grain Shipping Port In The Dominion

One-Third-World's Sheep Within Empire

British Dominions Produce Large Portion Of New Wool

Nearly one-half of the world's raw wool and over two-thirds of the wool entering world trade are produced within the British Empire. Exports of home-grown wool from Canada have developed rapidly since the war, these exports now amounting to a yearly average of 7,000,000 pounds, about 40 per cent of the entire Canadian production.

The world's sheep population is estimated at nearly eight hundred million head, of which about one-third are in the British Empire. They produce between 3,500 to 4,000 million pounds of wool yearly, and of this amount about 1,500 million pounds, including much of the best wool, comes from the Commonwealth of Australia, South Africa and New Zealand. Outside the Empire the important producing areas are the South American countries, the United States and Russia. Of these territories only South America has a surplus for export.

Belgian Memorial Stamps

Dedicated To Infantrymen Who Fell On West Front

Special postage stamps have been issued in Belgium, dedicated to the glory of the Belgian infantrymen who fought and fell on the Yser, at Neuport, Dixmude, and other sectors of the Western front.

The design common to both of the two denominations consists of a giant figure of an infantry soldier clad in great-coat, steel casque, and full equipment, striding amidst a blaze of light through the ruins of a village.

A total of 40,000 pairs was printed, and the stamps were sold at a premium upon their value in aid of the erection of a national monument in Brussels. Their values and colors are: 70 centimes (plus 3¢. 25c) red; and 1 franc (plus 4¢. 25c) blue. They make a notable addition to the many issues of stamps associated with the world war and its aftermath.

Thousands Use 'Plane For Channel Crossing

Demand Is Greater Than Accommodation According To Report

During June 4,311 travellers went by Imperial Airways between London and Paris, as compared with 2,208 in the corresponding month of 1931. The increase is notable and it is reported that the demand is greater than the accommodation. When Louis Blériot, the French aviator, made his pioneer flight across the English Channel, from Calais to Dover, a distance of 21 miles, in 37 minutes, on July 25, 1909, he had vision of the future of flying, but he could hardly have imagined that the science would make such tremendous progress in less than a quarter of a century—Montreal Gazette.

New Type Of Building

American Laboratory Constructed On Lines Of Thermos Bottle

A big laboratory recently built in America has been made on the lines of the thermos flask. Its walls are constructed to prevent heat from leaking either in or out. It is built entirely of concrete, with not a single window. Outside is a thick coating of cork with an outer layer of bricks. This acts as a heat insulator and maintains an unaltered temperature of 70 degrees. It would take a month in the depths of the severest winter for it to fall to 69 degrees. The purpose of the laboratory is to study the light given out by atoms at certain temperatures.

The surprising growth of Vancouver's grain trade during the past few years was summarized and clearly illustrated by R. C. Milroy, retiring president of the Grain Exchange Division of the Vancouver Merchants' Association. The occasion was the annual meeting of the division.

For the fourth successive year Vancouver has extended Montreal in exports of Canadian wheat. Ten years ago Vancouver's elevator accommodation was 1,500,000 bushels. Today, including additions now under construction, the port has the largest ocean grain elevator accommodation in the world, with 17,728,000 bushels. Montreal is second with 15,162,000 bushels.

In 1921-22 Vancouver exported 6 per cent of the Canadian wheat crop. In 1931-32 this port exported 44 per cent of the 4,500,000 bushels of crop. Montreal and other eastern Canadian ports 37 per cent, and United States ports 19 per cent.

Something New

Chicago World's Fair

Various Stages Of Manufacturing Taking Place Of Completed Exhibit

Chicago World's Fair in 1933 will be built on the theory that the "still exhibit" of previous expositions is out of vogue. Every exhibit will be in "motion." Instead of completed products on display, the public will be shown the various stages of the manufacturing process. Because of this there will be thousands of employees working on regular shifts in temporary factories during the six months period of the Fair. It is expected that 30,000 persons will be on the payrolls of the various concessions, exhibitors and educational displays.

Fresh Water Leviathans

Larger Boats Make Faster Time On Lake Trips

In only a few years over the century Welland locks have grown from 110 feet long to 560 feet, because Canadian business requires to handle its boats that have grown from 100 tons to 820 tons. Moreover these freshwater leviathans that we insist that we carry our wheat and ore can no longer pass the time to dawdle away 25 hours between Erie and Ontario as they have had to do. Speed goes with size nowadays and our newest and biggest carriers with their 25,000 tons under hatches can pass from lake to lake and clamber up or down the cliffs in a third of the time. —Montreal Star.

Dog Accepts Challenge

Careless with three hankies Miss Peggy Tyson of Winchester Mill, England, waved them playfully before her pet terrier.

The dog accepted the challenge and chewed up the money. Miss Tyson was able to collect and match enough of the pieces to have the bills cashed at the local post office.

Initiative Wins.

When Marshal Foch was given command of the French army during the World War, one of the first things he is reported to have said was: "To be a history and principles! What is the problem?" Though Foch was perhaps the world's greatest student of military strategy, he was no slave to it. He tackled each problem with initiative and vim. This method won for Foch.

The Review of Reviews magazine declares that a study of recent reports will show that those of the 19th century that exerted wide and sustained vim and initiative profited more than those which stood pat watchfully waiting, or those which initiated others. It points out that the larger the business, the more it tends to become standardized, system and routine often take the place of initiative and vim. This explains in part why a small organization will so often place a new, out-of-the-ordinary product upon the market, something for which a real need has long existed but which no one previously appeared to have recognized.

Safety glass, now used so widely for windshields and bank cages, is the result of alertness and initiative. Non-shattering glass was discovered accidentally by a French chemist who knocked over a test-tube that had been used for months. Stopping to pick up the pieces, he discovered that the paste substance in the tube held the broken glass intact. Mentally alert, the chemist remembered that the tube contained a mixture of tri-nitro-cellulose, ether and acetone. Experiments followed and safety glass was the result.

Rear Admiral David Watson Taylor is credited for having been able to reduce the coal bill of the United States Navy by one-half, utilizing the bow wave for ship propulsion. A bluestock company making money only erratically saw its sales rise enormously by fashioning cookies in the shape of dogs, animals, and similar interesting forms. A manufacturer of towels was able to build up sales enormously by introducing towels in colors to harmonize with the bathroom tiles. Children's towels were created. Complete ensembles were worked out—towels, washcloths, bathmats. That plant is reported to have maintained full capacity throughout the depression.

Foods have undergone marked development because of research followed by initiative. It was discovered that tomato juice is rich in vitamins A, B, and C, and in three years, tomato juice has caught the public's fancy. Progressive manufacturers of canning machinery were alert to their opportunity. In two years the sales of canned tomato juice have a gain of 629 per cent, and bottled 177 per cent.

Today there is no paucity of opportunities. But there is paucity of vision, initiative, and courage to capitalize them. As Charles Kettering, vice-president in charge of research, General Motors Corporation, says, "Business will come back when we get products that people want to buy. If one-tenth of the energy was spent in getting such products instead of stirring up the mud, we would get along better."

The task of leaders is to lead. There is not an industry or a line of manufacture but affords unappreciated opportunity for initiative. Today, as during the days of the World War, executives might think to advantage as Marshal Foch was thinking when he said, "To hell with history and principles! What is the problem?"

Britain Is Providing Underground Airports

"Planes Will Be Inclined To Come To Surface"

Underground airports are to be provided for the British Air force. This decision was made after it was found that no camouflage could hide the hangars from the powerful lenses now being used in military cameras. The new airbases will be at a minimum depth of thirty feet. There will be inclines for planes to come to the surface and take off.

It is good to have money and the things money can buy; but it is good, too, to check up once in a while, and make sure you haven't lost the things money can't buy.

Try Lydia E. Pinkham's Vegetable Compound

Felt Terribly Nervous

Faggot out, always melancholy and blue. She should take Lydia E. Pinkham's Vegetable Compound. Her action builds up the system. Try it.

W. N. U. 1935

Men's Greatest Invention

Hammer Is More Necessary Than Any Tool Made

If you ask half a dozen people what they consider to be the greatest invention ever made, the majority will suggest such things as the steam engine, the dynamo, or the electric telegraph. But these are only the results of a much earlier and far more important discovery. The earliest and greatest invention ever made by man was the hammer.

You cannot undertake any piece of constructional work without a hammer. Though you may not actually use it, it must have been employed in making the tools with which you do the work. The hammer set the first tool which enabled man to multiply his strength; to do something which was impossible with his bare hands.

It was probably invented by a remote ancestor who had the inspiration to use a stone for cracking the shell of an oyster or walnut. The earliest hammers had no handle. They were merely conveniently shaped stones held in the palm of the hand. But even such a stone to be used and you have a much more effective tool. Sharpen its business end to an edge by chipping off flakes, and it becomes a stone axe. The formation of an edge on the earliest flat tools could be done only by means of a hammer. The hammer thus gave birth to both the axe and the adze, the earliest of cutting tools.

From the adze and the chisel to the saw is but a step. The drill is simply a small chisel. It was first fixed to a round shaft and rotated by the palms of the hands; later, primitive man invented the bow and string method of turning it. The bow and string drill is still in use in certain trades.

Medical Science Finds Chinese Doctors Right

Experiments Prove "Pin-Prick" Cure Has Its Merits

The Chinese use a simple method of curing their patients which has always bewildered and amused the western world. If a man is ill, they stick a pin into him. If not a pin, at any rate, a needle or a copper wire, at the same point. They do just that, and nothing more. No drugs are used.

In a study many ailments this cure has nearly always been successful, and westerners put it down to faith curing—the powers of suggestion. Now, after many centuries, medical science has decided there is something in it, and the Chinese experts are asked to demonstrate their methods.

Pricking a patient with a needle in the right spot has a certain effect on nerve centers. Experiments have shown that it causes the cessation of violent neuralgia, or sciatica; it has given temporary relief from asthma and has proved helpful in various forms of nervous or internal disorders, giving instant relief. Research into acupuncture—"pin-prick cure"—has only just started, but it is quite likely that in a few years it will be largely used instead of pain-soothing drugs.

Stock Exchange Seats Up

Estimated Value Shows Big Increase In Short Time

With the recent sale of a seat on the New York Stock Exchange for \$120,000 the value of the 1,375 seats went up by 33 per cent. The estimated worth of the seats is now placed at \$165,000,000, an increase of \$41,250,000 over the total of a week before.

The traders in Wall Street are preparing to pick up where they left off for three years since the crash on October 29, 1929, when 15,600,000 shares changed hands.

People have been hoarding their money for a long time. They are beginning to feel the itch to spend. The stock exchange is one of the barometers, even if it is a place where many lose their savings. And the exchange is giving the itch to spend in its business—Border Cities Star.

Higher Education Popular

There were 57,294 students in the twenty-three universities in Canada during 1931, and 25,137 attended the 160 colleges in the Dominion. Of the net total of individual students, at both universities and colleges there were 46,354 males and 25,798 females who followed the higher education. The ladies secured 35.7 per cent of the diplomas, licenses and degrees granted.

Visitor says American schoolgirls are too fond of gum. Part of their civility, no doubt.

Keep that drain clear...

this easy way

Gillett's Lye dissolves clogging grease and never harms enamel

FREE BOOKLET: The Gillett's Lye Booklet tells many ways to make your drains clear. Gives complete instructions for soap making, for use in scrubbing, disinfecting, and other uses on the farm. Write to: Gillett's Lye, Ltd., Fraser, Idaho, and Liberty Street, Toronto, Ontario.

GILLETT'S LYE

EATS DIRT

Never dissolve lye in hot water. The action of the lye itself heats the water.

DON'T run up a plumber's bill every time your drain pipes clog. Fix them yourself... this easy, workable way. Just sprinkle Gillett's Pure Flake Lye down your drains and toilet bowls each week. Use it full strength, for Gillett's Pure Flake Lye will not in any way harm the finish of enameled sinks or bathtubs.

Grease and dirt dissolve like magic. Germs are killed. Odors banished. Your drains run free and clear. And... there's no plumber's bill afterwards!

Tell your grocer it's Gillett's Pure Flake Lye you want. This powerful scouring agent saves hours of scrubbing. Try a tin.

Motion Without Motive

Chinese Description Of Western Civilization Fits Speed Maniac

Judging by the number of convictions in recent weeks, the Canadian authorities are in earnest in their determination to make the highways of that Province safe for the average motorist. There is rarely any intelligent reason for driving a car beyond a reasonable speed. Occasionally, in an emergency, fast driving may be justified. For the most part it is merely craziness.

One of the most frequent causes of fast driving is the desire merely to pass some one on the way to nowhere in particular. Which gives point to the Chinese observer's description of Western civilization as "motion without motive." The speed maniac might just as well be driving around an enclosed motor speedway as on the public highways. Perhaps something of the kind may eventually be provided for those infected with the speed virus—Winning Tribune.

Buys His Home Village

After an absence of more than 40 years, William McGregor, who left his home in Lathernowen, Caithness, Scotland, to seek his fortune in Australia, has returned to become the owner of his native village. As a boy he was employed in herding cows. Director of several Australian companies, he came back to visit his sister, Miss Jessie McGregor, who still lives in the cottage where they were born. He bought the village when it was placed on the market recently. It has about 120 inhabitants.

Drives Asthma Before It. The smoke or vapor from Dr. J. E. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

His Vote

Newswid was showing an office friend over the young couple's new house.

"All this luxurious furniture is my wife's idea, you know," he explained. The friend nodded approvingly. "Very nice, I'm sure," he replied; "but surely you had a voice in the matter."

"Yes, the invoice," said the young husband.

Erosion taken 21 times as much plant food from the field and pastures of America as is removed by harvested crops.

Bad Constipation And Sick Headaches Ended By Vegetable Pills

Formerly a wreck from Constipation, Sick Headaches and Indigestion, Mr. V. H. writes: "It was a real letter day for me when I received Dr. Carter's Little Liver Pills. Results have been marvelous. Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels. Dr. Carter's Little Liver Pills are without equal for constipation, biliousness, poor complexion and indigestion. 25c & 75c per box. Ask for Carter's by NAME."

Mine Taken Over By Workers

Interesting Experiment Is Under Way In Nova Scotia

For a quarter of a century the people of Inverness, N.S., have been working for somebody else. Now they will be in business for themselves, directing and operating the coal mines that is the only industry in the town, and marketing its products.

Their co-operative plan, approved recently by the government of Nova Scotia, is expected to banish the threat, long dreaded by the town's 3,000 inhabitants, that the mine would be closed.

Under the agreement with the government, operation and control of the mine has been transferred to a new company, the Inverness Coal Co-operative Company, Limited, members of which are to be miners employed in that mine and taxpayers of Inverness.

Canadian Radio Programme Broadcast From "Plane"

Contact Made With Station From Height Of 3,000 Feet

An advertising stunt that proved of some scientific importance was accomplished here recently when Arthur Dwyer, local radio announcer, and Guyment M. Nesbitt, aeroplane pilot, successfully established contact with a Montreal radio office, flying 3,000 feet over the city. Both men gave short addresses which were clearly received by many wireless fans. It was believed to be the first Canadian radio program broadcast from an aeroplane, though short address were broadcast from the airship R-100 over Ottawa in 1930.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling and feed upon the interior surfaces. Miller's Worm Powder will not only exterminate these worms of whatever variety, but will serve to repair the injury they have done.

New Paint Seems Uncanny

How hot a kettle is at any moment can be told by the color of a paint which has just been invented. A kettle painted with the new material, which is a mixture of salts of mercury and copper, looks bright red when cold, but as it warms up above 140 degrees it becomes maroon colored. At 20 degrees higher it takes on a dull chocolate hue, and as boiling point it is quite black. Cooling brings its color back.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because of its action, while fully effective it is mild on the system.

"Too bad that Tom and the girl he's engaged too. Neither one of them is good enough for the other."

"Where did you get that idea?" "I've been talking the matter over with both families."

About one-half the world's lepers are in China.

Rice accounts for about 80 per cent of Siam's exports.

Feeder Purchase Policy

Designed To Encourage Winter Feeding Of Cattle And Lambs

Completion of the Feeder Purchase Policy designed to encourage the winter feeding of cattle and lambs of suitable type and quality is announced by the Hon. Robert Weir, Federal Minister of Agriculture. Under the terms of this policy, broadly put, the Federal Department will pay the reasonable travelling expenses of a farmer or his agent to the stockyard point of purchase, the feeder sales, or nearest station to range point at which the feeder stock is purchased. To secure the benefits of the policy at least one car of stock (20 head of cattle or 40 lambs, or a combined car, figured on 2 lambs as the equivalent of one beef animal) must be purchased. Stock purchased is subject to approval as to type and suitability by the official representative of the Dominion Live Stock Branch serving the point of purchase. Special provision has been made to extend the benefits of the policy respectively to farmers of Eastern Canada, of the Prairie Provinces, and of British Columbia. Complete details and information about the policy and the benefits can be secured by writing the nearest stockyard agent of the Dominion Live Stock Branch or direct to R. S. Hamer, Chief, Cattle Division, Dominion Live Stock Branch, Ottawa. The policy is operative for a period of five months from and after August 1, 1932.

Ontario Relief Organization

Public Welfare Board For Each Municipality To Handle Direct Relief

Organization of a public welfare board for each municipality to administer direct relief is recommended in the report of the advisory committee in direct relief to the Ontario Government, and announced by Hon. J. P. Montet, Minister of Public Works and Labor. Where possible, it is also suggested that an organization or league of organizations interested in public welfare should be organized to act in an advisory capacity and arrange for the conduct of campaigns in connection with the raising of funds, etc.

Housekeeping accounts on an Ohio farm indicate that a farm family of five people spends about the same money for food that a bachelor does in the city.

Eggs are better than a spring tonic. In view of the iron, vitamins and protein they contain, is the advice of the bureau of economics.

DR. HAMILTON'S PILLS

HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

THREW AWAY HIS STICK

When Solatica Yielded to Kruschen

There can be no doubt that this man has finished walking with a stick. For it is now four years since he discarded it.

He writes:—"For 18 months I suffered with chronic solatice and rheumatism, and was unable to walk without the aid of a stick. But after taking Kruschen Salts for a short time, I was able to throw away the stick. It is now four years since this happened, and I have had no return of the complaint, and have not a day from work. I shall never be without Kruschen Salts, as they are worth their weight in gold. You can use this letter as you please, as I can honestly recommend Kruschen Salts to any sufferer."—C. F.

If the eliminating organs become sluggish, they permit harmful uric acid to accumulate and deposit itself in the tissues, muscles and joints in the form of needle-pointed crystals, which, piercing the nerves, cause excruciating pains of solatice. The six salts in Kruschen stimulate the eliminating organs to healthy, regular action. Mischievous uric acid is then given no chance to collect.

WORLD HAPPENINGS BRIEFLY TOLD

Robert Mould, 67, who had been for nearly 40 years connected with the circulation side of the "News of the World," being its senior representative in the South of England, is dead.

Dr. John Stanley, junior research investigator on the staff of the National Research Laboratories, formerly of Vancouver, B.C., has resigned. He has accepted the post of assistant professor of biology at Queen's University, Kingston.

A royal robe of ermine, ornamented with ermine, to be worn on state occasions only, has been ordered by the emperor of Ethiopia from a firm of Montreal furriers. The major insisted the order be placed "within the empire."

The order of the Red Star, the highest decoration of the Ethiopian government, has been awarded to Col. Hugh L. Cooper, United States engineer, for his work on the huge Dinoprosity power development in southeastern Ukraine.

Having kept a census of horses since the World War, the British War Office will start one of automobiles.

Apartment buildings in Greater Copenhagen, Denmark, last year, totaled 8,522, the largest number ever recorded in any 12 months.

No change is to be made in the size of Canadian one dollar bills, the finance department stated recently. Recent rumor said the Canadian bill would be cut down in size, much after the style of the smaller United States bills.

British Columbia's oldest pioneer, Alexander MacLean, aged 81, who came to British Columbia 74 years ago and whose memories went back to the days when the site of Vancouver was dense forest, is dead. He was born in San Francisco.

Liner Card-Sharper Have Lost Occupation

Practice Is Almost Unknown Now On Atlantic Boats

In many of the world's big cities today, including London, England, are the scattered bands of clever and well-educated men who at one time were expert card-sharpers on the great luxury liners.

The depression, which brought about a scarcity of easy money, helped the police in their vigorous campaign against these men, who specialize in card-sharping aboard ships.

Their experience was high, and the stakes at most of the games were too low to produce any profit after paying their fares as first-class passengers.

Card-sharping on the Atlantic liners is today almost unknown.

Wonder somebody hasn't thought of using a motorcycle in a jazz band.

"Why do you sit and drink from morning till night?"

"Well, you don't expect me to sit up at night to do it?"—Altit for Altit Stockholm.

Seaplane Base At The Pas

Manitoba Town To Be Registered On Air Route Maps

Erection of a mast and wind cone on the bank of the Saskatchewan river, as a guide to fliers, will be arranged by the Board of Trade of The Pas, through the co-operation of the Imperial Oil Co.

The board will mark the landing place, and a mooring platform for pontoon equipped planes, will be arranged by the board.

H. L. Weber, agent at The Pas, for the Imperial Oil Co., offered the cost and assistance in its erection, and the board accepted the offer, passing a resolution of thanks to Mr. Weber's company.

The board will have The Pas, Man., registered on Canadian air maps as a fully equipped and qualified seaplane base.

New Form Of Advertising

Interesting Process Used To Project Writing On Clouds

Sky writing, a new form of advertising in which the message is projected on the clouds at night, was demonstrated at London. The government recently decided the method was legal. The process involves the use of metal stencils placed in the beam of a powerful searchlight to cast letters on to the cloud base. The searchlight used is of 400,000,000 watts.

For skywriting purposes the limit of its really effective range appears to be a cloud base of about 3,000 feet high. Trials of the system began contained up to twenty-five letters. Some include a design such as the British lion.

The depression, which brought about a scarcity of easy money, helped the police in their vigorous campaign against these men, who specialize in card-sharping aboard ships.

Their experience was high, and the stakes at most of the games were too low to produce any profit after paying their fares as first-class passengers.

Card-sharping on the Atlantic liners is today almost unknown.

Wonder somebody hasn't thought of using a motorcycle in a jazz band.

"Why do you sit and drink from morning till night?"

"Well, you don't expect me to sit up at night to do it?"—Altit for Altit Stockholm.

Increase Shown In Canada-Empire Trade

Statistical Review Issued By Department Of Trade And Commerce

Canada is becoming more empire conscious in her purchases. A statistical review, issued by the Department of Trade and Commerce, showed that nearly 30 per cent of the Dominion's imports in July came from empire countries as compared with only 26.3 in the corresponding month last year.

The percentage of foreign imports dropped from 73.7 per cent in July to approximately 70 per cent.

Compared with the preceding July, Canadian imports last month from foreign countries registered a drop of \$10,621,340, while those from empire countries decreased by only \$2,000,000.

In July Canada wrested from the Netherlands second place amongst countries of the world in supplying the cheese market of the United Kingdom. British trade figures, the Dominion Bureau of Statistics reports, show that the leading imports were: New Zealand, 14,602,208 pounds; Canada, 12,280,288 pounds; and Netherlands, 11,884,656 pounds. Canada was a sharp advance in the importation of Canadian canned salmon by the United Kingdom in July. British trade figures give the amount of 1,749,029 pounds as compared with 488,872 pounds a year ago. The United States supply last month was 405,584.

Why Outlined Profiles Are Called Silhouettes

Named After French Finance Minister

The black profiles called silhouettes are named after Etienne de Silhouette, the Finance Minister of France in 1759. Silhouette made an immediate name for himself by the stringent economies he effected in public finance. It was his policy to refuse to pay for more than "the shadow of any substance." The process of outlining profiles thrown by shadow on to a white sheet had just been introduced at that time, and as these pictures were considered exactly to resemble the Minister's averted policy, his name was immediately bestowed upon them.

Liquor In Bulk

Saskatchewan Commission Planning To Follow Lead Of Other Provinces

The Saskatchewan Liquor Commission is planning to follow the lead of other provinces and import certain brands of liquor in bulk instead of in bottles.

By importing bulkheads of liquor and bottling it here, a saving is effected on overhead items such as the cost of bottling and cask and the cost of the purchase scheme. It is expected, will mean lower prices to the purchaser.

BRITISH PARLIAMENTARIANS

Disfranchised Visitors Deliver Address On Trip Through Western Canada

By the achievement of the Imperial Conference we have shown how a great group of nations can organize for trade purposes along right lines, is the opinion of the Right Honourable Sir Philip Cunliffe-Lister, G.C.B., M.P., Secretary of State for the Colonies, expressed during a brief stop in Winnipeg on a tour over Canadian Pacific Railway lines to the west coast.

Sir Philip was accompanied by a group of keen young British parliamentarians eager to see western Canada in the harvest season. Among them were his own private secretary, Captain F. L. Dugdale, M.P. for Richmond and Yorkshire, one of the largest agricultural constituencies in England; J. P. L. Thomas, M.P., private secretary to the Secretary of State for Dominion Affairs; Geoffrey Lloyd, M.P., private secretary to the Lord President of the Council; and Viscount Hinchinbrooke, private secretary to the Right Honourable Stanley Baldwin.

"In England," said the distinguished visitor, "we have taken the tariff out of politics and put it into business, making it an entirely business proposition. The tariff has been adjusted to what the business men and no more. Recognition of that fact marks all the agreements that were reached at the conference. Everything was approached from the point of view of the equilibrium between supply and demand, so that all would get the fairest prices."

Sir Philip has had British manufacturers devote more attention to the results of the concessions made by the Dominion Government and that the situation and the market possibilities were already being studied. He had every confidence in the ultimate result.

The Secretary of State for the Colonies and his party spent a week in Banff as guests at Banff Springs Hotel and the surrounding resort through which they moved. Proceeding to the Pacific Coast Sir Philip addressed several meetings under Canadian Club auspices and also spoke at Winnipeg on his return trip at a board of trade luncheon at the Royal Alexandra Hotel.

Secure Animal Pictures

American Nature Association Party Meet With Success In Rockies

After four weeks on the trail along the northern boundary of Jasper National Park and the adjacent mountains of British Columbia, the American Nature Association party returned to Jasper Park Lodge with several thousand feet of big game motion picture films.

Under the leadership of Arthur N. Pack, Princeton, N.J., president of the association, the party included Laurence S. Rockefeller, Tarrytown, N.Y., son of John D. Rockefeller, Jr., Mr. Pack, Mr. and Mrs. Robert W. Johnston and Mr. and Mrs. W. B. Bryan, Jr., all of Princeton.

Some novel stalking won a number of fine shots for the camera crew. Wearing white costumes with hooded Mr. and Mrs. Pack aroused sufficient interest amongst the ordinarily-suspicious goats to approach within a few feet of them on one occasion.

In Tongva Valley the party discovered a herd of more than 100 caribou and acquired some fine close-ups. Later, in the Snake Indian River country, they ran across practically every kind of game in the Canadian Rockies.

"I got one fine bull," said Mr. Pack. "By dropping on his hands and knees and imitating him when he lowered his head and stamped his foot to show anger. We exchanged blows and compliments until I had crawled to within ten feet of him. Then he took to his heels and it all made a fine picture."

A Worth-While Idea

Here's a little idea worth keeping tucked back somewhere in your mind. Remember that it is always a good plan to remove the spare from the rack in the rear or out of the fender well before jacking up the car to take off the flat. Otherwise, in getting the spare loose the car may be shaken enough to cause it to slip off the jack.

Iceland has 1,605 automobiles.

OGDEN'S

CUT PLUG

OGDEN LIVERPOOL

If you "roll your own," use Ogden's fine cigarette tobacco.

Your Pipe Desires The Best!

... particularly when the best costs you no more than ordinary tobacco. Smokers realize how much more fragrant, how cool, how satisfying a pipe can be when it's loaded with Ogden's cut plug.

OGDEN'S CUT PLUG

SUNDAY SCHOOL LESSON

SEPTEMBER 11

ISRAEL JOURNEYING TOWARD CANAAN

The Start From Sinai, verses 11-28.

"The children of Israel had left Egypt as undisciplined rabble when they are an orderly host—they set forth according to their journeys. In due order they were counted, and the camp of Judah, and then the other tribes in their prescribed order. They were to march in the order of the tabernacle and all its furnishings in the care of those appointed for this service. They were to go on the way to the 'place of which the Lord said, I will give it to you.' Unaware as yet that more than thirty-eight years would have passed before their descendants, not they themselves, would enter that Promised Land."

"In the life we walk today the path is as that of the Hebrews (read). We need the shadowing rock as they; We need, like them, the guide of God."

The Prophecy To Hahab, verses 29-32—Hahab was Moses' brother-in-law, according to Judges 4:11. The son of Jethro, who had visited Moses at Sinai and had returned to his home, Socoth 18:27. Before starting on the march Moses brought Hahab to go with them. "Come thou with us, we will do thee good," he said with confidence, assured that God would be with them, and that the good which would come to them from God they would share with Hahab.

Moses was right in telling Hahab that they would do him good. "Unrepentant, out of the way of the great movements of humanity, gaining nothing as generations went by, but simply reproducing the habits and treasuring the beliefs of their fathers, Hahab's Arab tribe had no prospect, no future. Compared with that poor outlook, how good it would be to share the noble task of establishing on the soil of Canaan a nation devoted to truth and righteousness, in league with the living God, destined to extend His faith and make His faith the means of blessing to all"—Robert A.

Can you truthfully say to others that if they come with you, you will then do them good? Are you big enough and true, so that your association with them will help to elevate and ennoble them?

Recipes For This Week

(By Betty Barclay)

BANANA BETTY

- 2 cups rice flakes crushed.
- ½ cup butter, melted.
- 2 apples.
- 2 bananas.
- ½ cup sugar.
- ½ teaspoon cinnamon.
- ½ cup water.
- 2 tablespoon lemon juice.

Four melted butter over rice flakes crumbs and mix thoroughly. Place a layer of one-third the prepared crumbs in bottom of buttered baking dish. Cover with 1 apple and 1 banana, pared, and thinly sliced. Sprinkle with half the sugar, cinnamon, and lemon juice. Cover with another layer of crumbs and repeat, using remaining fruit and seasonings. Pour water over mixture. Bake in moderately hot oven (375 degrees Fahrenheit) 30 minutes. Serves 6.

COCONUT SALAD DELICIOUS

- 2 cups cabbage, finely shredded.
- 1 cup grated pineapple, drained.
- 1 cup coconut, premium sized.
- ¼ cup mayonnaise.

Dash of salt.

Crisp cabbage by allowing it to stand in ice water. Drain and dry thoroughly. Toss lightly together with remaining ingredients. Serve on crisp lettuce. Garnish with strips of pineapple and cut chopped chives. Serves 6.

"Is that your college diploma you have framed there?"

"Well, it's a sort of diploma. It's a worthless stock certificate showing that I've been through the school of experience."

British Speed Up

Telephone System

Invention Called "Ghost Circuits"

Perfected By Post Office

In an effort to speed up the British telephone system the post-office has perfected an invention which is expected to prove revolutionary.

A new system of "ghost" telephone circuits using one pair of telephone lines has been introduced.

It established a new British record when first inaugurated to tell the world of Kaye Don's record-breaking run in the British speed boat, "Miss England III," on Loch Lomond.

"The new development is based on the carrier wave system of voice transmission," said an official of the G.P.O.

"It is really after the principle of wireless applied to the telephone. The engineers, who have been testing at the research station in London, have established that in theory one circuit of two wires can be used for any number of circuits."

"Conversation on the 'ghost' circuit is absolutely private. This is regarded as a great achievement."

Church Service Held

On Nelson's Flagship

Was Notable Event Of Navy Week At Portsmouth

Naval officers and blue-jackets stood backboard with citizens of Portsmouth, on the decks of the Victory, for the first public church service that has ever been held to usher in Navy Week.

More than a thousand people gathered on the stonings pavings below surrounding the famous old warship to join in the service, which was relayed by loud speakers.

The hymns were, "O God our help in ages past," and "For those in peril on the sea."

The Bishop of Portsmouth based his sermon on the life of the navy's greatest admiral, Nelson.

A small group of people afterwards filled Nelson's day cabin, two decks below, surrounded by his own furniture, to receive communion from the admiral's own communion plate.

A Record For Speed

Parcel From Montreal Reached Bagdad In Thirteen Days

From Montreal to Bagdad in 13 days—this is the record established in sending a 10-pound sample consignment of Canadian industrial products to Bagdad.

Of the 13-day period, seven days were taken for an ordinary steamship crossing from Montreal to Liverpool.

From the Mersey-side the package was expressed to London, thence by airmail to Cyprus airport where it was just in time to catch the London-Indian mail plane. On the 13th days of its journey the consignment reached its destination, ready to capture a new market in the Near East.

Why argue? If you are right, you learn nothing. And being wrong teaches you so much you don't want to learn.

"The neighbor's piano is too loud. Shut the door."

"It is shut."

"Then turn the key."—Pages Gales, Yverdon.

Threshers' Licenses

All operators of Threshing Bids and Combines in Alberta, whether for private or public use, are required to be registered annually; the fee being One Dollar (\$1.00).

The fee for 1932 season is now due and payable at

DEPARTMENT OF AGRICULTURE
Edmonton, Alberta.

The members of the O. E. S. held their first meeting of the season on Thursday, September 1. Mr. D. H. Galbraith of Vulcan was present and delivered an extremely interesting address, choosing as his topic "The Book of Ruth."

The wheat fields of the Champion district will produce approximately 1,000,000 bushels of wheat this year, according to a recent estimate made. The estimated average yield is placed at 22 bushels per acre.

K. R. McLean, R.O., of McLean and Anderson, Sight Specialist of 224-8th Ave West, Calgary, will make his monthly visit to Champion, Friday, Sept. 30th, at the Drug Store.

Watch for announcement of Big Dance, Champion Community Hall, Sept. 28th. Music by "The Calgarians," one of Calgary's best dance orchestras.

WE SELL AND RECOMMEND
Wampole's
Extract of
Cod Liver
The Best Tonic for
Coughs, Colds,
Influenza and Grippe

It is better than ordinary cough medicines, for it reaches the seat of the trouble, relieves the cough and supplies continual treatment to build up the system to withstand future attacks. A splendid blood and body-building tonic for both young and old who take it regularly.

Game Regulations for Alberta

The National Parks Service of the Department of the Interior, Ottawa, has just issued the Regulations regarding Migratory Birds for the current year.

A summary of the Regulations as they apply to Alberta follows:

OPEN SEASONS

—Both Dates Inclusive—
Ducks, Geese, Coots, Rails, Wilson's or Jack-Snipe.

In that part of Alberta lying north of the Clearwater and Athabasca Rivers: from noon on September 1, to and including November 14.

In that part of Alberta lying south of the Clearwater and Athabasca Rivers: from noon on September 15 to and including November 14.

CLOSED SEASONS

There is a closed season throughout the year on Elder Ducks, Wood Ducks, Swans, Cranes, Curlew, Willets, Godwits, Upland Plover, Black-bellied and Golden Plover, Greaser and Lesser Yellow-legs, Avocets, Dowitchers, Knots, Oyster-catchers, Phalaropes, Killdeer, Surf-birds, Turnstones and all the shore birds not provided with an open season in above schedule.

There is a closed season throughout the year on the following non-game birds:

Auks, Aukslets, Bitterns, Fulmars, Gannets, Grebes, Guillemots, Gulls, Herons, Jaegers, Loons, Murres, Petrels, Puffins, Shearwaters and Terns; and there is a closed season throughout the year on the following insectivorous birds: Bobolinks, Catbirds, Chickadees, Cuckoos, Flickers, Flycatchers, Grosbeaks, Hummingbirds, Kinglets, Martins, Meadowlarks, Nighthawks or Bull-bats, Nuthatches, Orioles, Robins, shrikes, Swallows, Swifts, Tanagers, Titmice, Thrushes, Vireos, Warblers, Waxwings, Whip-poor-wills, Woodpeckers and Wrens, and all other perching birds which feed entirely or chiefly on insects.

No person shall kill, hunt, capture, injure, take or molest any migratory game birds during the closed season; and no person shall sell, expose for sale, offer for sale, buy, trade or traffic in any migratory game bird at any time.

The taking of the nests or eggs of migratory game, migratory insectivorous and migratory non-game birds is prohibited.

The killing, hunting, capturing, taking or molesting of migratory insectivorous and migratory non-game birds, their nests or eggs is prohibited.

The possession of migratory game birds killed during the open season is allowed in Alberta until January 31, following open season.

QUOTA LIMITS

Ducks, 15 in the aggregate of all kinds in any day during September; and in any day during the balance of the open season, Ducks 25; Geese 30 in any day; Coots and Rails 25; Wilson's or Jack-snipe 25; and not more than 100 Ducks or more than 25 Geese in one season.

GUNS AND APPLIANCES

The use of automatic (auto-loading), swivel, or machine guns, or batteries or any gun larger than number 10 gauge is prohibited, and the use of any aeroplane, powerboat, sail boat, live birds as decoys, night light, and shooting from any horse-drawn or motor vehicle is forbidden.

The shooting of migratory game birds earlier than one hour before sunrise or later than one hour after sunset is prohibited.

The penalty for violation of the Migratory Bird laws is a fine of not more than three hundred dollars and not less than ten dollars, or imprisonment for a term not exceeding six months, or both fine and imprisonment.

NOTICE

Any person found Hunting or Shooting on the W & of Sec. 24-15-23, W. of 4, will be prosecuted.
